Dear Customers,

Welcome to our Monthly Newsletter

Listen Inc. SoundCheck 19 Released:

SoundCheck is the most powerful and flexible audio test system. It can measure virtually any audio device, from simple transducers to complex telecoms, Bluetooth and voice-controlled devices.

New Features for multi-channel and room acoustics, as well as many usability upgrades including:

- Multichannel RTA
- WASPI-Exclusive Mode
- Diagnostic Window
- Room Acoustic RT60 (optional module)
- [AmpConnect 621](#) Control
- USB Controller Knob Compatibility

[Click here to learn more.](#) Call us or send emails to us to receive a quote for upgrading all your SoundCheck systems.

IRISS – The Delta T- Alert Sensor

A Simple Device with Staggering Results

Delta-T Alert™ is a wireless, self-contained temperature-monitoring sensor that attaches to an electrical enclosure cover. it is simple to install and comprises of two temperature sensors – one to monitor the electrical enclosure's interior temperatures and the second to monitor the ambient room temperature where the enclosure is located. The Delta-T Alert™ sensors are then configured to collect data daily, at specific time intervals. The data is wirelessly transmitted for analysis and trending and warns the operator of abnormal temperature rises within their electrical enclosures before more serious problems occur. As a result, Delta-T Alert™ provides an easier, more effective way to prevent costly electrical damage and system downtime.
