Dear Customers,

Happy Lunar New Year ! Welcome to our Monthly Newsletter

CAI 700LX Series - Chemiluminescence Analyzers

CAI offers three analyzer models that utilize chemiluminescence technology for analyzing NO, NOx and NO2 concentrations within a gas sample.

The chemiluminescence method is used to measure the reaction between ozone and nitric oxide. In the NOx mode, the sample is routed through a converter. The resultant reaction is directly proportional to the total concentration of NOx. The 700 LX Series Analyzer are now available for Remote Control.
